Hydraulic Guide + Product Care

Refer to AS3500 for required outlet + pipe sizing appropriate to your application.

Hydraulic Table For critical performance, always consult a hydraulic engineer.

CHANNEL	LATERAL FLOW RATE	DN40 SPIGOT	DN50 SPIGOT	DN80 SPIGOT	DN100 SPIGOT
38mm x 40mm	0.4 L/s	0.5 L/s	-	-	-
65mm x 40mm	0.7 L/s	0.5 L/s	1.0 L/s	-	-
65mm x 25mm	0.4 L/s	0.5 L/s	0.5 L/s	-	-
100mm x 20mm	0.4 L/s	0.5 L/s	0.5 L/s	0.5 L/s	0.5 L/s
100mm x 30mm	0.6 L/s	0.5 L/s	0.8 L/s	1.0 L/s	1.0 L/s
100mm x 40mm	0.9 L/s	0.5 L/s	1.0 L/s	1.0 L/s	1.1 L/s

Lateral flow rate is the flow rate along the channel towards the outlet or open end. All flow rates specified for spigots are vertical flow rates.

Product Care With regular care, Stormtech Grates will stay in prime condition

Stormtech stainless steel requires minimal attention under normal circumstances.

Environmental Conditions

Exposure to certain chemical or environmental conditions may, over time, promote surface oxidation. This is not a defect in the stainless steel and can be removed with a stainless steel polish.

Areas close to salt water, particularly breaking surf, are high corrosion environments with additional care required - Stormtech recommends electropolishing.

Electroplated Colour Finishes

Electroplating your Stormtech grates provides a decorative coating of copper, brass or bronze which changes naturally over time subject to local conditions and environment.

Electropolished Stainless Steel

Electropolishing your Stormtech linear drainage provides a superior surface finish and added protection against high salt and chlorine environments.

By removing iron and enhancing the chromium/nickel content, electropolishing creates a smoother finish which resists tea-staining and is easier to sterilise and maintain.

Warranty Information

Stormtech proudly provides a ten year warranty covering workmanship on our grate and channel products.

The Stormtech powder coat warranty excludes peeling and flaking caused by chipping or scratches.
